Experience

OneTrust

4 years 7 months

Web Software Engineering Manager

July 2022 - Present (1 year 5 months)

Atlanta, Georgia, United States

- Proficiently supervise and offer guidance to two team of 10+ developers, facilitating the development of SaaS solutions while enabling proficiency in API, Java, and Adobe Experience Manager (AEM) to facilitate a seamless transition to a platform.
- Revamp the customer-centric eCommerce journey, optimizing purchasing processes and simplifying account creation for platforms such as OneTrustPro.com, Dataguidance.com, and Cookiepro.com, resulting in an impressive 16% surge in purchases totaling over \$1 million within a single quarter.
- Spearhead the orchestration of the end-to-end CI/CD pipeline implementation for multiple projects, resulting in a substantial 30% reduction in deployment time, enhancing efficiency and accelerating project timelines.-
- Oversaw the end-to-end project planning lifecycle, leveraging JIRA and Monday boards to allocate resources, track tasks, and ensure seamless project execution within a dynamic agile environment.

Software Engineer Manager/Director

May 2021 - August 2022 (1 year 4 months)

Atlanta, Georgia

- Successfully orchestrated the management of 4 teams comprising 20+ developers each, overseeing the successful release of notable websites and SaaS platforms including OneTrust.com, Dataguidance.com, SharedAssessments.org, and OneTrustpro.com.
- Pioneered the expansion and launch of a SaaS offering within four months, leveraging Drupal and VueJS on Microsoft Azure Cloud, by spearheading the enhancement and launch of the SharedAssessments.org SIG Portal.
- Devised and implemented comprehensive technical architectures and streamlined data flows for backend development across multiple teams, resulting in a remarkable 20% reduction in bug tickets.
- Strategically guided and mentored Team Leads, driving the establishment of best practices and standards across all platforms, culminating in an impressive 30% enhancement in workflow efficiency.
- Championed and facilitated the growth of both front-end and back-end developers, actively fostering their success through guidance and goal-setting, leading to the elevation of 6 developers to leadership positions.
- Expertly managed the technical delivery aspects encompassing custom development, integrations, and data migrations spanning Drupal and WordPress platforms.
- Directed and led a high-performing team in the successful development of a single sign-on (SSO) solution using SAML 2.0, contributing to a notable 5% increase in user logins within a span of just one month.

Web Development Team Lead/Manager

June 2019 - May 2021 (2 years)

Atlanta, Georgia, United States

- Led the OneTrust Web Development Team, successfully delivering over 20 marketing websites using WordPress, powered by a tech stack including PHP, HTML, SCSS, Node.js, and Javascript.
- Streamlined the development process by consolidating forms and components into a single repository, facilitating seamless deployment across multiple websites.
- Championed training and mentorship programs for fellow developers, fostering the implementation of innovative ideas and codes to enhance team efficiency and technical prowess.
- Orchestrated the creation and integration of a payment portal for OneTrustPro.com, seamlessly connecting it with Chargebee and Stripe APIs.
- Demonstrated expertise in crafting 5+ dynamic and interactive WordPress websites, leveraging a diverse array of languages including HTML, CSS, PHP, JavaScript, and JQuery, resulting in captivating animated web displays.

- Maintained open communication by delivering timely technical progress updates and project statuses to the Directors, VP, and CTO.
- Architected and executed a robust deployment process for the Web Development Team utilizing BitBucket and Jenkins, ensuring efficient and reliable project delivery.

Lead Web Developer

May 2019 - June 2019 (2 months)

Atlanta, Georgia, United States

- Successfully trail blaze the redevelopment and launch of the new OneTrust.com website within a mere three weeks of joining the OneTrust team.
- Instituted innovative standards and guidelines for fellow developers, resulting in heightened efficiency within web development processes.
- Exhibited an expert aptitude in problem-solving, creative ideation, and effective leadership, guiding web developers across various projects utilizing platforms such as WordPress, Salesforce, and Drupal.

FRED Agency

7 years 3 months

Senior Interactive Web Developer

March 2012 - May 2019 (7 years 3 months)

Atlanta

- Researched and evaluated programming languages and codes to enhance website efficiency, ensuring optimal performance across diverse devices and 300+ websites.
- Developed an interactive application that seamlessly accessed data via PHP and JavaScript, interfacing with SOAP and REST APIs from major platforms including Facebook, Twitter, Instagram, Real Page, Property Solutions, and Yardi.
- Developed 70+ WordPress websites using languages such as HTML, CSS, PHP, JavaScript, and JQuery such as Findersites.com, TheRentersGuide.com, CrescentCommunities.com, PacApts.com and TribridgeResidential.com.
- Optimize websites according to Google's SEO guidelines, Schema.org structures, and ADA Compliances, which produced websites that scored 90% and higher.
